

Allowing the expansion of Low Power FM (LPFM) radio stations in a manner that would give them priority over stations already using FM translators would have a negative impact in many communities. K-Love radio, and other similar stations, provide a Christian-based, family-oriented broadcast that is not available in this area of southeast Idaho from any other source. The message of God's love, forgiveness, and eternal salvation is THE most important message that anyone can EVER hear. In our lifetime, THE ONLY choice we'll ever make that endures for all of eternity is our choice to either accept or reject Jesus Christ as Lord and Savior. NOTHING else matters once our spirit leaves this earth. The K-Love broadcast is an extremely effective method of spreading this message, not only in our area but across the country using FM translators, and around the world on the internet. The secular music formats that would likely replace stations such as K-Love only serve to corrupt the minds of our children and lead them from the path God has laid out for us as described in His word, the Holy Bible.

Each and every day, numerous people are touched by the K-Love broadcast and these people give their lives, and their eternities, to God. I pray that you would take into consideration that taking away this broadcast means that countless souls will be lost forever because they would not have the opportunity to hear the message of salvation that K-Love and these other similar stations provide.

Thank you

Stephen Denison
